

# BTL Emsella™

At  Chesapeake Weight Loss

## GENERAL INFORMATION FOR PATIENTS

Emsella is an amazing new device used to treat urinary incontinence, particularly stress urinary incontinence, that annoying leakage when you cough, sneeze, laugh or exercise. This unique technology revolutionizes incontinence treatment by providing a completely non-invasive option. In fact, the patient remains clothed in her usual clothing during the treatment!

Emsella effectively stimulates pelvic floor muscles with thousands of supramaximal contractions per session. This strengthens the pelvic floor muscles, leading to regained control over bladder function. The sessions are only 28 minutes long, and patients can return to work or enjoy usual activities immediately afterwards. The usual treatment recommendation is for 6 sessions, generally administered twice a week for 3 weeks.

You should not have this treatment if you have metal in the pelvic area such as a copper IUD or a hip replacement.

## PRICING

MOST HEALTH SAVINGS ACCOUNTS AND FLEXIBLE SPENDING ACCOUNTS PERMIT THIS USE

Emsella single treatment	\$349	(national average is \$450)
